

CONTRACTOR's BENTONITE SLURRY FAVORITE ADDITIVE

LESAP™

pH Reducer & Easy Calcium Contamination Control

INFORMATION SHEET

Composition	Sodium Acid Pyrophosphate.
Physical properties	White powder or granules. pH (1% solution) = 4.3. Solubility in water : 13% @ 25°C. Bulk density : 1.0 g/cc
Proportioning	.1 to .2% depending on the amount of hydrated cement encountered
Toxicity	Acidic salt, avoid ingestion
Impurities	Industrial grade : 95% pure
Storage and Handling	Store in dry area for product stability. Avoid contact with product by using eye protection and long sleeve shirt.
Spillage	Sweep or vacuum. Reuse if dry, dispose if wet.
Precautions	Avoid breathing dust. Avoid contact with eyes.
Fire	Non flammable product
